PRODUCT DATA SHEET

Sika MonoTop®-610

Bonding primer and reinforcement corrosion protection cement based slurry

DESCRIPTION

Sika MonoTop®-610 is a cementitious, polymer modified one-component coating material containing silica fume used as bonding primer and reinforcement corrosion protection.

USES

- Suitable as a bonding primer as part of a concrete repair system
- Suitable as reinforcement corrosion protection as part of a concrete repair system

CHARACTERISTICS / ADVANTAGES

- Easy to use, just add water
- Adhesion to concrete and steel
- Good resistance to water and chloride penetration
- Can be applied with a brush or by wet spray technique

APPROVALS / STANDARDS

PRODUCT INFORMATION

Chemical Base	Portland cement, silica fume, re-dispersible polymer powder, selected aggregates and additives	
Packaging	25 kg bags	
Appearance / Colour	Grey powder	
Shelf Life	12 months	
Storage Conditions	Store properly in undamaged original sealed packaging, in dry cool conditiones between +5 °C and +35 °C	
TECHNICAL INFORMATION		
Compressive Strength	~30 -35 MPa after 28 days*	(EN 12190)
Tensile Adhesion Strength	~2.0 MPa after 28 days	(EN 1542)
Shear Adhesion	Pass	(EN 15184)
Diffusion Resistance to Water Vapour	~300 µH₂O	

~3800 μCO₂

Pass

SYSTEM INFORMATION

Diffusion resistance to carbon dioxide

Levelling/Smoothing Mortar

Sika MonoTop®-620

APPLICATION INFORMATION

Mixing Ratio	For hand application $^{\sim}$ 5.5 litre water (22%) per 25 kg bag For spraying application $^{\sim}$ 5.0 litre water (20%) per 25 kg bag	
Fresh mortar density	~1.80 kg/l	
Consumption	As Bonding Primer - This depends on the substrate roughness and thickness of layer applied. As a guide, ~1.5 - 2.0 kg of powder per m² per mm thick. As Reinforcement Corrosion Protection - As a guide, ~2.0 kg of powder per m² per 1 mm layer thickness	
Yield	25 kg of powder yields approximately 14.3 litres	
Layer Thickness	As bonding primer - sufficient to coat the concrete surface in a thin layer filling uneveness, pores and pits. As reinforcement corrosion protection- 2 mm minimum thickness	
Ambient Air Temperature	+5 °C minimum; +30 °C maximum	
Substrate Temperature	+5 °C minimum; +30 °C maximum	
Pot Life	~90 to 120 minutes at +20 °C	
Waiting Time / Overcoating	Apply concrete repair wet on wet with bonding primer Apply concrete repair wet on dry reinforcement corrosion protection	

APPLICATION INSTRUCTIONS

SUBSTRATE QUALITY / PRE-TREATMENT

Concrete:

The concrete shall be thoroughly clean, free from dust, loose material, surface contamination and materials which reduce bond or prevent suction or wetting by repair materials. De-laminated, weak, damaged and deteriorated concrete and where necessary sound concrete shall be removed by suitable means. Steel Reinforcement:

Rust, scale, mortar, concrete, dust and other loose and deleterious material which reduces bond or contributes to corrosion shall be removed. Surfaces shall be prepared using abrasive blast cleaning techniques or high pressure water-blasting to Sa 2 (ISO 8501-1).

MIXING

Sika MonoTop®-610 can be mixed with a low speed (<500 rpm) hand drill mixer or by hand for a small quantity.

Pour the recommended water in a suitable mixing container. While stirring slowly, add the powder to the water and mix thoroughly at least 3 minutes.

APPLICATION

As Bonding Primer

Thoroughly pre-wet the prepared substrate a recommended 2 hours before application. Keep the surface wet and do not allow to dry. Before application remover excess water e.g. with a clean sponge. The surface shall appear a dark matt appearance without glistening and surface pores and pits shall not contain water. Using a suitably clean brush, roller or suitable spraying equipment cover the substrate in a thin layer filling all unevenness, pits and pores.

As Reinforcement Corrosion Protection
Using a suitably clean brush or spraying equipment apply a first layer to cover the reinforcement bars approximately 1 mm thick. When first coat is hard to the finger nail, apply second layer approximately 1 mm thick. If using a spray method, protect substrate from excessive over-spray wiping away any concrentrated accumulation and wait until completely dry before to apply repair mortar.

CURING TREATMENT

As reinforcement corrosion protection- protect the fresh mortar immediately from premature drying and contamination using an appropriate curing method.

CLEANING OF TOOLS

Clean all tools and application equipment with water immediately after use. Hardened material can only be mechanically removed.

LIMITATIONS

- Avoid application in direct sun and/or strong wind and/or rain
- Do not add water over the recommended dosage
- Apply only to sound, prepared substrates
- Refer to the Method Statement for Concrete Repair using Sika MonoTop® system for more information

BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

ECOLOGY HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request. It may be necessary to adapt the above disclaimer to specific local laws and regulations. Any changes to this disclaimer may only be implemented with permission of Sika® Corporate Legal in Baar.
