1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Identification of the substance or preparation

Product name or Trade name : Sikalastic®-841ST Comp A

Use of the substance/preparation : Chemical product for construction and industry

Company/undertaking identification

Manufacturer/Distributor : Sika South Africa (Pty) Ltd.
9 Hocking Place
Westmead, 3608
South Africa

Telephone no. : +27 (0)31 792 6500
Fax no. : +27 (0)31 700 1760
e-mail address of person responsible for this SDS - : headoffice@za.sika.com
Emergency telephone number : +27 (0)31 792 6500

2. HAZARDS IDENTIFICATION

<table>
<thead>
<tr>
<th>Hazardous Components</th>
<th>CAS number</th>
<th>OSHA PEL</th>
<th>ACGIH TLV</th>
<th>Vapor Pressure</th>

</thead>
<tbody>
<tr>
<td>4,4'-Diphenylmethane Diisocyanate</td>
<td>101-68-8</td>
<td>0.2 ppm (Ceiling) N/E</td>
<td>0.005 ppm</td>
<td>&lt;5.0mm Hg@Temp 25C (77F)</td>
</tr>
</tbody>
</table>

3. COMPOSITION/INFORMATION ON INGREDIENTS

Boiling Point: >230°C (446°F).
Specific Gravity: (H2O=1.0) 1.11 – 1.13

4. FIRST AID MEASURES

First aid measures

Inhalation : Remove victim to fresh air, assist breathing if required. Get medical attention as required.
Ingestion : Do not induce vomiting. Give water or milk to drink. Seek medical attention. Do not give anything by mouth to an unconscious person.
Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Notes to physician : No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

See section 11 for more detailed information on health effects and symptoms.

5. FIRE-FIGHTING MEASURES

Extinguishing media

Suitable : Dry chemical, foam & carbon dioxide. If water is used, use large quantities of cold water. The reaction between water and hot isocyanate may be vigorous.

Special exposure hazards : In a fire or if heated, a pressure increase will occur and the container may burst.

Date of issue : 14.12.2009
MSDS no. : FC-5
5. FIRE-FIGHTING MEASURES

Hazardous combustion products: Water contamination will produce carbon dioxide. Do not reseal contaminated containers as pressure build-up may occur and rupture container.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. ACCIDENTAL RELEASE MEASURES -

Personal precautions: Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment (see section 8).

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Large spill: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13).

Small spill: Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container.

7. HANDLING AND STORAGE -

Handling: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use.

Storage: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Packaging materials

Recommended: Use original container.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION -

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>Occupational exposure limits</th>
</tr>
</thead>
<tbody>
<tr>
<td>No exposure limit value known.</td>
<td></td>
</tr>
</tbody>
</table>

Recommended monitoring procedures: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

Exposure controls

Date of issue: 14.12.2009

MSDS no.: FC-5
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Occupational exposure controls** -
- Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

**Hygiene measures** -
- Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing.

**Respiratory protection** -
- If airborne concentrations exceed the TLV use a positive pressure breathing apparatus.

**Hand protection** -
- Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: Butyl rubber/nitrile rubber gloves.

**Eye protection** -
- Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

**Skin protection** -
- Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: Use barrier skin cream.

**Environmental exposure controls** -
- Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. PHYSICAL AND CHEMICAL PROPERTIES -

**General information**

**Appearance**
- Form: Thin clear liquid.
- Color: Clear.
- Odor: Negligible odour.

**Important health, safety and environmental information**

- Boiling Point: >230°C (446°F)
- Flash point: >123°C (253°F)
- Density (H2O = 1.00): 1.11 to 1.13 g/cm³ [20°C (68°F)]

10. STABILITY AND REACTIVITY -

**Stability** -
- The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

**Conditions to avoid** -
- Heat, high temperature, open flame, sparks and moisture

**Materials to avoid** -
- This material will react with any material containing active hydrogens, such as water, alcohol, amines, alkalis, acids and metal compounds. Some reactions can be violent.

**Hazardous decomposition or by-products** -
- Carbon Dioxide, Carbon Monoxide, Nitrogen oxides, Ammonia, trace amounts of Hydrogen Cyanide and unidentified organic compounds may be formed during combustion.

11. TOXICOLOGICAL INFORMATION -

**Potential acute health effects**

- **Inhalation**: May cause irritation to mucous membranes in the respiratory tract (nose, throat, lungs). High vapor concentrations may cause central nervous system (CSN) depression.
- **Ingestion**: Can cause gastrointestinal disturbances (sore throat, abdominal pain, nausea, vomiting and diarrhea).
- **Skin contact**: Systemically toxic concentrations will probably not be absorbed through human skin.
- **Eye contact**: May cause eye irritation. Prolonged vapor contact may cause conjunctivitis.
- **Chronic effects**: Repeated exposure > current occupational limits may cause allergic sensitization to the respiratory tract.
12. ECOLOGICAL INFORMATION

Environmental effects : Avoid contact of spilled material and runoff with soil and surface waterways. Do not empty into drains; dispose of this material and its container in a safe way.

13. DISPOSAL CONSIDERATIONS -

Methods of disposal : The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Packaging : Completely emptied packagings may be given for recycling. Empty packaging may still contain hazardous residues. Empty packaging should be removed by a licensed waste contractor.

14. TRANSPORT INFORMATION -

International transport regulations

ADR
Not regulated.

IMDG
Not regulated.

Marine pollutant : No.

IATA
Not regulated.

15. REGULATORY INFORMATION -

EU regulations -
Classification and labeling have been determined according to EU Directives 67/548/EEC and 1999/45/EC - (including amendments) and take into account the intended product use. -

Classification : This product is not classified according to EU legislation. -

16. OTHER INFORMATION -

History

Date of printing : 14.12.2009
Date of issue : 14.12.2009
Date of previous issue : No previous validation.

Notice to reader

The information contained in this Safety Data Sheet corresponds to our level of knowledge at the time of publication. All warranties are excluded. Our most current General Sales Conditions shall apply. Please consult the Technical Data Sheet prior to any use and processing.
